DETAILED ACTION

Allowable Subject Matter

Claims 1-8 are allowed.

Claims 1-8 are allowable over the prior art of record for at least the reason that even though the prior art discloses a laser resonator apparatus where a diffractive element or a combination of two diffractive elements is used to produce a supergaussian laser beam at the output, the prior art fails to teach or reasonably suggest a multipoint lump homogenizing optical system comprising a diverging diffraction optical element for dividing the homogenized supergaussian beam into a plurality of supergausssian beams and a lens for converging the branched supergausssian beams on multipoints defined on an image plane laid at the focus of the lens, as set forth by the claimed combination.
